SOVIET AIRFIELD AT ASPERN

[Redacted]

[Redacted]

[Redacted]

A truck [Redacted] was seen [Redacted] driving from Kagan in the direction of Aspern. It bore a sign with the word "Driving School" in German. The truck was occupied by several air force soldiers.

There are no indications of preparations for expanding the airfield; all the fields surrounding it are cultivated by the farmers in a normal manner.

The bunker [Redacted] is surrounded by wooden posts which have been painted a brilliant white. It is secured by barbed wire and is guarded. It is brightly illuminated at night. It is possible that this is the bombs and ammunitions depot. 50X1-HUM

Aspern gives the impression of a town with many troops in it, with a good possibility that 800 to 1,000 men are quartered in the vicinity of the airfield. The airfield looks neglected. 50X1-HUM
