DKF CATALOGUE OF ANTIFRICTION BEARINGS (75 pp; German; undated; [REDACTED])

25X1A

This document is a photostat of the catalogue of the German Ball Bearing Factory (DKF) of SAG (Soviet Corporation) Transmasch. The catalogue contains descriptions of all the antifriction bearings produced by DKF. There are also sketches of some of the bearings produced. The catalogue includes the following information on the bearings produced by DKF: standardization, type of constructions, nomenclature, markings, selection and types, bearing strength, tightness, fastening possibilities, lubrication, outside measurements, measurement by conjunction, test results.

Further, the catalogue gives the dimensions and bearing strength for each type of bearing produced.
