SECURITY INFORMATION

PORT OF NACALA

The port of Nacala lies about 50 miles North of Mozambique. Government has built a Railway siding linking Nacala to the main Nampula/Mozambique line.

They are also contemplating the construction of an accostable dock berthing pier at Nacala but no one will ever know when the plan may ever be executed.

Nevertheless, it is reported that Government are also entertaining ideas of declaring Nacala open for Cargo Steamers when loading and unloading operations will have to be carried out by means of lighters and cargo barges just as such operations are being done at Mozambique and Lumbo.

Note:- This information was given on the 13th September, 1949 and up to this moment we cannot add anything more.
