SOURCE [Redacted]

1. Shortly before the International Geological Conference convened in Algiers in September 1952, I was a member of an excursion that went into the mining areas of Morocco. In connection with this expedition, I was furnished two geological maps and a number of geological schematic drawings. The maps were Carte Geologique du Nord-Ouest de L'Afrique 1:2,000,000, Algeria-Tunisie File 2; Carte Geologique au 1/200,000 du Kharb, Trerif et Rif Occidental (Societe Cherifiennne des Petroles).
2. In my opinion, both of these maps are excellent and I must admit that I was agreeably surprised at the general high quality of geological work by the French.
