

WORKING PAPER

16 SEP 1982  
WJF/dlg

25X1

Discussion Topics for  
Science and Technology Advisory Panel  
(STAP)

Meeting, 1400-1500, Wednesday, 15 September 1982  
(Room 1S02, Community Headquarters Building)

Agenda

- Issues, schedule of briefings and designated guests for the forthcoming meeting are attached.

25X1

STAP Studies and Projects

Technology Transfer: STAP assisting [redacted] and Technology Transfer Intelligence Committee (TTIC) in review of successful Soviet efforts to improve their ICBM accuracy. Key issue is to determine to what degree Soviet acquisition of western technology (legally or otherwise) contributed toward Soviet advances in this strategic capability.

25X1

Status-Establishing terms of reference, gathering data, initial discussion with TTIC on 10 September 1982.

S&T Personnel: STAP participating in IC Staff study [redacted] Office of Planning) regarding efforts to insure the U.S. Intelligence Community has, and will have, an adequate supply of qualified scientific and technical personnel. Review generated by requirement identified in Long Range Capabilities Study. STAP will examine those technical, management, and security policies which impact on the recruitment, retention and development of S&T manpower.

25X1

Status-Terms of reference and study outline approved. Steering group established. Data collection underway.

B-930

TOP SECRET

Small Systems R&D: STAP examining desirability and feasibility of a theoretical proposal to have the Intelligence Community establish a research and development "agency" to support basic R&D on small intelligence systems; those which do not warrant large program support (i.e., satellite systems) but which are necessary for unique and sometimes limited intelligence operations (e.g., covert HUMINT collection or anti-terrorist operations).

Status-Research nearing completion. Several members have drafted papers on this issue. Papers to be considered during 16 September 1982 Meeting.
