INVESTIGATION OF THE ANODIC PROCESS IN AN
ALUMINUM BATH. [1961] 10p. 9 refs. MDF A 132.
Order from OTS \$0.50 62-11356

Trans. of Zhurnal Prikladnoi Khimii (USSR) 1956,
v. 29, p. 908-914.

DESCRIPTORS: Electrolysis, *Aluminum, *Anodes,
Polymerization, Electrochemistry, Gases.

An experimental study was made of the dependence of
the anodic gas composition and the magnitude of the
polarization on the current density. It was established
that the variation of the gas composition on the anode
of an aluminum bath does not proceed monotonically as
the current density varies. There are two inflection
points at $D = 0.1 \text{ A/cm}^2$ and at $D = 0.3 \text{ A/cm}^2$ on the
curve expressing this dependence. Breakpoints, corre-
