WIND OVER A CITY (Veter v Usloviyakh Goroda)
tr. by Irene A. Dorehoo. May 61 [7]p. 2 refs.
Order from OTS or SLA \$1. 10 61-23079

Trans. of Glavnaya Geofizicheskaya Observatoriya,
Leningrad. Trudy (USSR) 1960, no. 94[156] p. 29-32.

DESCRIPTORS: *Wind, Velocity, Urban areas

Observational wind speed data from television towers
in Kiev and Leningrad are analyzed. The diurnal
course of mean vertical wind speed profiles, up to a
height of 180 m is presented. The roughness length and
the angle of the change in wind direction with height,
over a city, is obtained. It is noted that over cities the
large roughness length of the underlying surface causes
a weakening of the stratification's influence on wind
speed in the lower layers. The deviation angle of the
surface wind from the isobars increases over the city.
(Earth Sciences--Meteorology, TT, v. 6, no. 6)
