SOME TRANSFORMATIONS OF PROGRAM SCHEMES
(O Nekotorykh Preobrazovaniyakh Schem Programm).
25 Jan 61, 15p. JPRS: 7626.
Order from OTS \$0.50

61-21194

Trans. of *Problemy Kibernetiki (USSR) 1960, no. 4,
p. 59-68.

The problems in linear algebra that are discussed include matrix multiplication and the finding of the characteristic equations of matrices. Transformations are indicated by means of which programs written for the solution of the problem in the general case may be adapted to take advantage of peculiarities in the input data (in particular, the symmetry of the matrices). Such transformations permit a more rational utilization of the computer memory. In the problems under discussion, the operators are functions of the row and column indexes in the matrices.
