Artemov, I. S.
NEW METHOD OF HIGH-GRADE DISTILLATION OF
LIQUIDS. [1963] [6p]
Order from OTS, SLA, or ETC \$1.10 TT-63-20794

Trans. of Akad[emiya] Nauk SSSR. Doklady, 1949,
v. 64, no. 3, p. 357-360. (Abstract available)

DESCRIPTORS: *Distillation, Liquids, Water,
Pressure, Vaporization, Gas flow,

The liquid is evaporated at a temperature lower than
its boiling temperature under atmospheric pressure,
with a stream of purified air sweeping its surface to
carry off the vapor. The rate of distillation at a given
temperature increases with the velocity of the air
stream particularly at low velocities and tends to level
off as the velocity is increased. Water distilled once
by this method has an electrical conductivity of
 $0.5 \times 10^{-6} \text{ ohm}^{-1}$, i.e., a purity of the same order as
(Chemistry--Physical, TT, v. 11, no. 4) (over)
