DESCRIPTORS: *Liquid metals, *Electromagnetic
pumps, Nuclear power plants, Atomic energy
engineering.

The author gives a survey on electromagnetic pumps,
which are little known in Germany and may be of some
interest there for nuclear power purposes. Several
types are described and the difference of conduction
and induction pumps shown by means of simple consid-
erations. The range of power of these pumps is re-
ported and a short view of problems of materials given.
