Trans. of Akademiya Nauk SSSR. Doklady, 1959,
v. 128, no. 5, p. 876-879.

The fundamental solution is presented of the Fokker-Planck-Kolmogorov equation for the case in which F is linear with respect to the highest derivative, using a functional integral related to the Wiener measure integral. If the original system is linear, the functional integral can be calculated in final form. An approximation becomes an accurate solution of the problem.
