no. 1, p. 33-39.

DESCRIPTORS: Floating bodies, *Ice, Arctic regions,
Surface properties, *Albedo.

Variations of the albedo of snow and ice are explained,
first of all by the changes of the state of the surfaces.
This leads to the conclusion of the necessity of creat-
ing an album of the underlying surfaces. About 80
photographs of different surfaces of snow and ice were
collected at station North Pole-6 in 1956 and 1957.
