NASA TT F-72

National Aeronautics and Space Administration.
SOLAR RADIO PHENOMENA AND THEIR PHYSICAL
INTERPRETATION. (Les phénomènes radio-
électriques solaires et leur interprétation physique.)
J. F. Denisse. (Presented at 13th General Assembly
of International Scientific Radio Union, London,
Sept. 12, 1960.) September 1961. 10p. OTS price,
\$0.50. (NASA TECHNICAL TRANSLATION F-72)

Centimeter bursts and type IV bursts are interpreted
as synchrotron radiation. Type III and type II bursts
are probably due to excitation of oscillations of the
coronal plasma by high energy particles. The
particles that create type II are probably trapped in a
magneto-dynamic wave. Radio storms are similarly
due to particles ejected during an eruption and
remaining trapped for several days in the magnetic
configurations near the sun.
