Dersin, H.
INTERPRETATION OF THE EXTENT OF PROTECTION OF CHEMICAL PATENTS AND DETERMINATION IN ADVANCE OF THE EXTENT OF PROTECTION WITHIN THE COMPASS OF THE GRANTING PROCEDURE. [1958] 26p. 21 refs.
Order from SLA ml\$2.70, ph\$4.80 61-10447

1. Patents--Germany
1. Dersin, H

Trans. of Angewandte Chemie (West Germany) 1958, v. 70, no. 5, p. 123-128.

An interpretation is given of the extent to which the patent office examination procedure would be able to contribute to better safeguarding of rights in the interpretation of patents, especially in the chemical field. An ideal arrangement suggested would be, among other things, the creation of a patent court of justice. However, even today, by cooperation between the courts and the patent office, and by due consideration of the practice of interpretation of the courts, improvements could be attained by the patent office.
