Ryby. pub. by Gosorgizdat, 1959.

DESCRIPTORS: *Frozen food, *Fishes, Freezing,
*Processing, Preservation, *Food, Irrigation systems.

It is recommended that blocks of small fish are defrosted by an irrigation method. This reduces the time required for defrosting by a factor of 1.5-4.5 as compared with immersion methods and simplifies the process of separating thawed fish from the block and from each other. Moreover, irrigation methods obviate the possibility of defrosted fish being of variable quality.
