DESCRIPTORS: *Chemistry, Scientific research, High
pressure research, Refractory materials, USSR

The chemical researches carried out during the period
1917-1942 in laboratories directly attached to the
Academy of Sciences are listed without reporting their
details or giving specific references. A great expansion
of the scope of chemical research is revealed with an
ever increasing tie with various industries of U. S. S. R.,
although the primary purpose of the review is given as a
discussion of the new trends in chemistry which origi-
nated during the above mentioned period. (Author)
