Order from SLA ml\$2.70, ph\$4.80 61-10480

Trans. of Erdöl und Kohle (West Germany) 1957, v. 10,
no. 7, p. 433-441.

Methods are described by means of which multiconstitu-
ent mixtures such as occur in petroleum oils and in
fuels and lubricants obtained by hydrogenation can be
characterized by just two characteristic constants, the
density and the index of refraction. The method thus
broadly meets the requirement of the industrial chemist
for controlling the course of production by a quick,
simple means which make minimum demands on the
technical personnel. Homograms for the evaluation of
specific industrially-produced fractions are included.

2. Astronomy--Theory
- I. Kukarkin, B.
- II. DSIR LLU M.2199

Trans. of unidentified Russian article, 1951 or later.

Cosmological theories of N. N. Parysky, V. G. Fesenkov, V. A. Ambartsumyan, O. Y. Schmidt, and V. I. Vernadsky are briefly reviewed and their role is noted in the refutation of the reactionary hypotheses of capitalist thinkers such as Jeans and Milne.
