on Aniline Resins. [1961] 7p. 4 refs.
Order from SLA mi\$1.80, ph\$1.80 61-10600

Trans. of Kogyo Kagaku Zasshi (Japan) 1953, v. 56,
no. 7, p. 554-556.

We measured the viscosities of aniline hydrochloride-
formalin water solutions and discovered the following
facts. When the concentration of formaldehyde relative
to aniline was increased progressively, emulsification
took place and the solution solidified subsequently to a
jelly-like state. At approximately the time that emulsi-
fication could be observed by the naked eye, the vis-
cosity of the solution rose abruptly. When we held the
quantity of formaldehyde relative to aniline constant and
investigated the influence of the glass wall at 50, 40,
30, 20, and 10°C, it was seen to have no influence. The
activation energy was calculated from the curve of

ON THE MOLECULAR WEIGHT-DISTRIBUTION OF
ANILINE RESINS. Rept. no. 8 of Studies on Aniline
Resins. [1961] 9p. 4 refs.
Order from SLA mi\$1.80, ph\$1.80 61-10599

Trans. of Kogyo Kagaku Zasshi (Japan) 1953, v. 56,
no. 3, p. 198-200.

We synthesized three systems of resins, whose proportions of formaldehyde relative to 1 M of aniline were 0.5 M, 0.7 M, and 1.0 M, and discovered the following facts. We measured the mean molecular weights and viscosity changes and found that although the curves ascended in the beginning, they began to decrease gradually past a certain point. Fractional precipitation was conducted with respect to the aniline resin of 1 : 0.7 mole ratio and its integral distribution curve and mass distribution curve were sought; it was seen as a result that the integral distribution curve stood up progressively in resins of after 45 (Materials--Plastics, TT, v. 5, no. 12) (over)

ON THE STRUCTURE OF HYDROCHLORIC ACID-
ACIDIC ANILINE-FORMALIN RESINS. Rept. no. 6
of Studies on Aniline Resins. [1961] 7p. 9 refs.
Order from SLA mi\$1.80, ph\$1.80 61-10603

Trans. of Kogyo Kagaku Zasshi (Japan) 1952, v. 55,
no. 7, p. 485-487.

The detection and determination of free amino groups
in the resins confirmed the belief that formalin adds
onto the amino groups. (Lectured at the fourth annual
conference of the Chemical Society of Japan, on
April 8, 1951.)

Trans. of Zeitschrift für Elektrochemie (West
Germany) 1953, v. 57, no. 8, p. 632-636.

The energy-time curve of explosions and detonations
of several primers was observed by means of the
piezoelectric method. The temperature of the ex-
plosion was calculated, the maximum gas pressure
was measured, and the pressure and energy yields
were determined. (Author) (A lecture given at the
52nd Main Session of the German Bunsen Society for
Physical Chemistry in Duisburg on May 16, 1953)
