DESCRIPTORS: \*Textile industry, \*Synthetic fibers,  
Production, \*Dyeing, \*Microscopic analysis, Tempera-  
ture, \*Wet cells, Electrical equipment, Chemical  
analysis, Pipettes

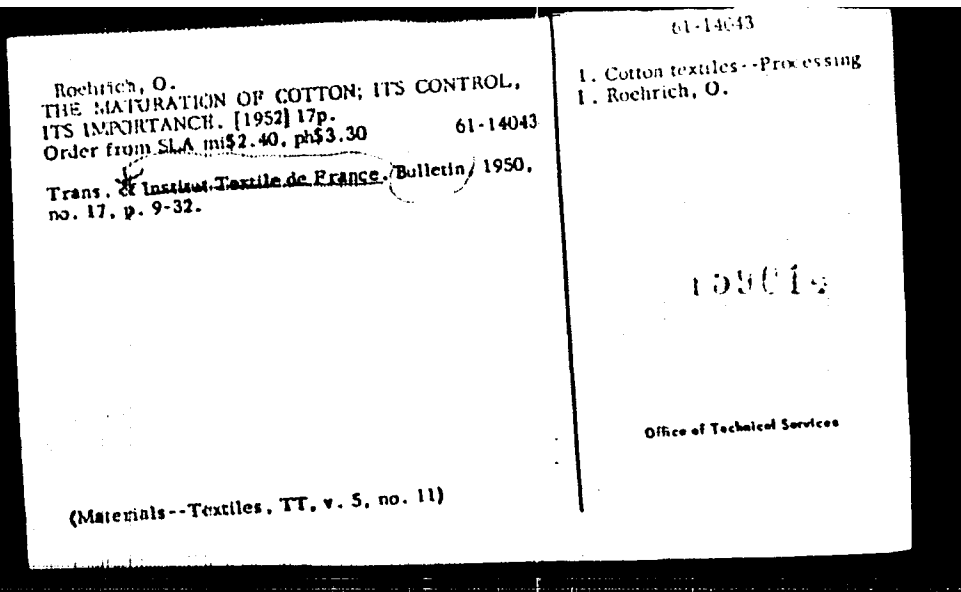

A cell is described that can serve for study of the  
action of any reactant on textile fibers or even, after  
modification, on objects other than fibers. It can be  
placed on a hot stage (the Eisenberg type of Leitz for  
example), which allows study at different tempera-

Parisot, A.  
THEORY OF WEAR. Pt. 1 of Wear-Resistance of  
Cotton and Linen Fabrics. [1961] 26p.  
Order from SLA \$2.60      61-14974

Trans. of [Institut Textile de France], *Bulletin*, 1958,  
no. 73 [p. 7-25].

DESCRIPTORS: \*Cotton textiles, \*Textiles, Textile in-  
dustry, Mechanical properties, Chemical properties,  
Fibers, Deformation.

From a qualitative point of view, the theory outlined  
makes it possible to characterize the mechanical be-  
havior of a fabric from the mean load-stretch curve of  
its fibers, and from the mean deformation imposed on  
them by the construction of the fabric. It thereby per-  
mits us to define purely mechanical wear as the loss of  
mechanical resistance with no appreciable variation in  
the load-stretch curve, and purely chemical wear as  
the loss of mechanical resistance resulting from the  
(Abstracts--Textiles, TT, v. 6, no. 5)      (over)

no. 5, p. 15-21.

Tests show that the disappearance of the striae of lower  
tension than that of the surrounding medium as well as  
the existence of defects in the boundary surfaces are  
due to the surface tension. A cullet of a higher surface  
tension than that of the composition glass should not be  
used when melting glass. The considerable influence  
is shown of the reducing atmosphere of the furnaces on  
the surface tension of the vitreous mass and on the dis-  
placement of the layers, by which it is possible in the  
manufacture of amber yellow glass, to obtain a regular  
coloration. (Author)

Trans. of Société Médicale des Hôpitaux de Paris.  
Revue Médicale et Chirurgicale (France) 1950 (ser. 4, v. 66)  
no. 33/34, p. 1701-1716.

**DESCRIPTORS:** \*Blood plasma, \*Osmotic pressure,  
Measurement, \*Kidneys, Pathology, \*Metabolism,  
Electrolytes (Physiology), Body Fluids

Elevation of the "effective osmotic pressure" may  
indicate renal insufficiency. A lowering of the pressure  
is encountered especially in states involving a loss  
of electrolytes, and in the course of fluid overload  
such as those observed in acute.
