FILE Training-6

MEMORANDUM FOR: Deputy Director of Central Intelligence
FROM: Max Hugel
Deputy Director for Administration
SUBJECT: Senior Training Courses

Bobby:

1. As per our previous conversation, attached are the rough schedule and details of the new 12-week Senior Officer Development Course (this course was originally 16 weeks long and was cut down to 12 weeks). This course has not been implemented and I have a hold on it. I have also been informed by the Director of Training and Education that, although the original estimate was that they would need an additional 10 people to run this course, he now feels that he might have the opportunity to move around certain slots where he might not need any additional people at all or at most maybe 3 people.

2. We did have in place a 9-week Senior Seminar course and I am attaching a copy of the details of this particular course. I understand it was not very effective and is not in operation today.

3. I spoke with all of the other Deputy Directors and it seems that the proposed new course was initiated by Admiral Turner who originally wanted a 1-year course. Our people feel that the 12-week course, as outlined, can be very effective.

4. At any rate, Bobby, I know you wanted to take this up at the next Executive Committee meeting but I give you this background information so that you can clearly understand where we are and what the situation is.

CONFIDENTIAL

SENIOR OFFICER DEVELOPMENT COURSE

September 13 - December 18

Rough Schedule *

WEEK I

- fundamental factors influencing relations among nations
- evolution of the intelligence function in the US

WEEK II

- the intelligence community
- the organization of CIA
- the senior officer as manager

WEEK III

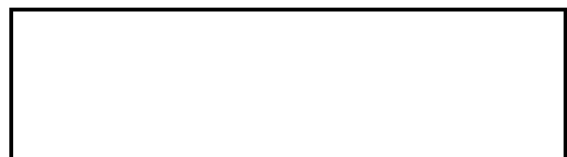

- the national security decision process
- the intelligence consumers who participate in that process
- Congress as consumer
- the role of the intelligence product in the formulation and execution of national policy

WEEK IV

- the national estimate as product
- SALT support
- other key products - briefings, PDB, SIG support
- evaluating the product

* Most of the course members' time will be spent in small group exercises using the case study method. Advance reading will be required of the course members along with some preliminary essays. Panel discussions will supplement lectures where possible. Some external reading and essay writing will also be required throughout the course.
