Applications

Xerox 2700 high quality cut paper laser printers were made operational on the SAFE unclassified development system on 13 October. These printers were installed at CSPO (424 Ames) and currently three SAFE contractor sites; CRW, Infodata, and Logicon. Three more will be installed at TRW and Geodynamics/RCA. (U)   STAT

The DEcision Support and Information System for Terrorism (DESIST) project team is awaiting completion of the updates to the SAFE Top-Level Design Specification in order to complete assessing the impact of using SAFE software with DESIST. (U)   STAT

Software programming and unit-level testing is progressing steadily, with 87% of the software already complete, 9% scheduled for the 25 October build, and the remainder scheduled for the final build on 23 November. Software integration testing is now accelerating after a slow start-up period, with 44% of the test cases already executed, 46% scheduled through the end of November, and the remainder scheduled during December. (U)   STAT

Although Britton-Lee, Incorporated (BLI), the vendor of the Intelligent Data Base Machine (IDM), has demonstrated an operation IBM-to-IDM block multiplexor interface at their development center (in Los Gatos, California), the interface boards delivered to the P/S Development Facility continue to manifest problems. ODP and TRW will send a technical team to Los Gatos to assist BLI in problem identification. BLI expects to solve these problems and deliver operational interface boards on 24 October and 19 December. (U)   STAT

On 19 October, the P/S delivered an informal test requirements data base download to the CAMS2 Tasking Segment (T/S). On 7 November an informal system-to-system test will commence with the   and the P/S Phase II   STAT
Requirements Review will be held. On 10 November, an informal design walk through will be held for software items scheduled for P/S Release 8404 (1 September 1984). (U)   STAT

Booz-Allen delivered a project plan for the TADS User Documentation Contract. The plan is based on a 13-month schedule, with completion in mid-October 1984. A detailed work plan will be developed and delivered on 30 November. Current activity is focused on TADS user interviews and familiarization with the TADS online environment. (U)   STAT

Work is continuing on the analysis and modification of programs which will produce W-2s for the 1983 tax year. The largest impact on the W-2 processing results from the Medicare

Tax. The Medicare gross and tax information will have to be incorporated throughout the W-2 system which will require changes to approximately 25 programs. | | (U)   STAT

The six-week Automated Data Processing Accelerated Curriculum (ADPAC) is underway with 15 students enrolled. The second course, Fundamentals of PL/I, and the third course, Fundamentals of Data Base Management Systems, were completed. | | (U)   STAT

Processing

The construction contractor is still working on installing the alarms and panels for the emergency warning detection system in the Northside Computer Center. This work is expected to be completed within two weeks. A full center test of the alarm system will be conducted upon completion. | | (U)   STAT

The IBM 6670 Laser Printers and the 3203 IBM Printer have been installed in the | | Computer Center for the Output   STAT
Services Branch and are scheduled to be operational in the near future. The 3203 and two of the 6670 Laser Printers will be used to support CAMS. The third 6670 will be for VM. | | (U)   STAT

On 17 October, a release valve located in the basement power room burst causing the Emerson 60 cycle UPS system to shortout. The UPS 60 cycle system was down for approximately 12 hours. | | (U)   STAT

The use of 3270 Emulation of the Delta Data 7260T in the Special Computer Center has been extended to a new product, User Files Online (UFO). This 3270-oriented product for programmer productivity enhancement was installed and made operational without any change to it, which was a goal of the emulation project. | | (U)   STAT

New RAMIS software has been made available for user testing. It includes RAMIS Release 83.1M, RAMIS Programmers Interface (RPI) 5.0.1, and RAMIS/GIMS Interface (RAMGIM) 1.2. This software will be in test mode until 30 November 1983 for | | STAT
Center VM1/VM2 and MVS; Special Center VM and VMS; and CAMS2 Development VM. | | (U)   STAT

The trouble desk handled a total of 750 phone calls for the week of 11-14 October 1983; 525 incoming calls, 175 outgoing calls, and 91 Wang calls. Of the incoming calls, 114 reported terminal problems. | | (U)   STAT
