24 October 1983

Dear John:

DDA REGISTRY  
FILE: 45-3

These two announcements relate to our earlier discussions about our project performance. If you have any questions about them, give me a call. In any event, when I next see you I will amplify certain aspects of [redacted] role.

STAT

I did meet with [redacted] as you suggested. We met on 13 October for about an hour and [redacted] was also present. In this meeting he seemed interested in two topics namely, what is [redacted] and who is [redacted] and, secondly, a very general discussion around how the Government and contractors interact on R&D projects. There was essentially no discussion of any specific projects.

STAT

He did tell me that his staff is just beginning a study/review of the procurement process in response to concerns raised by some of the committee members and (I know you must be aware of this review) we agreed I would meet with him again.

I'll be in Washington several times in late November and early December and will call your office for an appointment.

Best regards,
