

Bruce -- 16 January

1. Paul Borel has a memorandum on the retirement system which he needs your comments on.

2. You and Carl Duckett will accompany the Director on Thursday for the Senate Arms Service Committee Briefing. RJS will discuss this with you personally with instructions on how the Director wished it handled. He said to prepare carefully. Carl will handle backup for S&T, and you will handle deployed systems, the resource allocations aspects, etc. Special attention is to be given to accuracy in wording to conform to NIE language. I reviewed the latest draft with Jack this morning.

3. On next Tuesday (the 23rd) the Director will brief the Fulbright Committee (foreign affairs) which will be world wide, and as Jack put it, just filled with land mines. It has not yet been decided how this will be handled.

4. With respect to the State Defense Study Group Baseing Study, Jack indicated he has been made responsible to designate the CIA representative and that he has decided to name you. He hastened to say that this does not mean that you have to do all the work but that you would be responsible to provide substantive intelligence for this group. General Reynolds is completing his study of Intelligence Requirements for Bases World Wide which will be a USIB-based document. You are not responsible for that. Substantive analysis will be your area of responsibility.

5. With respect to the Stennis Sub Committee Hearings on Strategic Posture Jack instructed [REDACTED] to discuss with John Warner the ground rules for handling. Jack indicated that OSR would be the focal point in preparing this presentation and that your responsibility would include pulling together material from ONE or OER, etc., as might be required. Nothing concrete is to be done until we hear from [REDACTED]
