8 November 1974

MEMORANDUM FOR: Mr. Geza Feketekuty
Director, Policy Planning and
Trade Analysis
Office of the Special Representative
for Trade Negotiations

SUBJECT : Tariff Profile for the United States

1. The attached summary table and detailed printouts are in response to your recent request for a tariff profile of the United States by BTN chapter (2-digit level).

2. The printouts were generated from the 1971 GATT trade tapes included in the STR Centralized Data Base. They are the first reports from the data base. For each range of duty rates, the imports subject to duty are listed by dollar value. These dollar values are then expressed as a percentage of total imports for all chapters, as requested by James Walsh of your office. In addition, the dollar values and percentages are cumulated down the tariff range. Only imports subject to duty are listed within the duty ranges, i.e., free items are excluded. The value of free items is included, however, in calculating the percentages. The cumulative percentage, therefore, adds to less than 100%.

4. [redacted] will be pleased to answer any additional questions you may have on this subject.
