1. [REDACTED] was the PFB member on the Domestic Real Estate Task Force which made a study of space utilization. The resultant report was issued on 25 October 1968. [REDACTED] stated that he was in complete accord with the report and had no major variations or further explanations at this time.

6. There is some question in [REDACTED] mind concerning the nature of holds which have been placed on the 2430 E Street Buildings. He agrees that the State Department would probably like to use the Navy Hospital Buildings and the Agency Buildings on that hill or remove them and construct a new facility there. However this is a long way off. He also noted that the Task Force had made a deliberate attempt to determine the strength of the Kennedy Center claim for the land. GSA has the land listed on its charts for the possible use of the Kennedy Center, but the Center is so short of funds that it is having difficulty in completing the present site and building program.

7. In the course of his work on the Task Force [REDACTED] spent two days at GSA. At that time he was given some examples of costing construction projects. He turned this material over to me for the use of the NPS. Included with a few project examples is an "economic cost model" which indicates the manner in which submissions of this type are desired by GSA.
