AUTHOR: Kalata, Zbigniew

TITLE: The physiological effect of weightlessness

PERIODICAL: Astronautyka, no.2, 1962, 31-33

TEXT: Different methods of creating a state of weightlessness are discussed, including that of immersion of the body in liquids. Among a large number of pilots who were asked to execute a ballistic parabola in course of which a short (up to 60 sec) state of weightlessness is created, two thirds of the pilots did not report any unpleasant feeling while one third complained of some disturbances of the nervous system. Several tests of coordination of movements were performed with the aid of a movie camera which proved that, in a state of weightlessness, coordination of muscles is affected. This may be overcome by training. It was found that the cell metabolism is only slightly affected by the state of weightlessness. Weightlessness affects the ability of the organism to withstand acceleration. There are 2 figures. ✓

TITLE: Legends for geomorphological maps of mountainous regions on the scale of 1:1,000,000 (based on Tien Shen, the Altai, and the Urals)

SOURCE: AN SSSR. Otdeleniye nauk o Zemle. Geomorfologicheskaya komissiya. Metodika geomorfologicheskogo kartirovaniya (Methods of geomorphological mapping). Moscow, Izd-vo Nauka, 1965, 85-89

TOPIC TAGS: geomorphology, cartography, topography, aerial photography

ABSTRACT: The authors emphasize the need for clear and consistent legends for geomorphological maps of vast mountainous regions and propose a legend which can be used to depict the morphology and development stage of the relief on a single map. The legend lists 10 basic stages in the development of the relief (I-Mesozoic, II-Cretaceous, III-Upper Cretaceous, IV-Paleogene, V-Neogene, VI-Pliocene Lower Quaternary, VII-Lower Quaternary, VIII-Middle Quaternary, IX-Upper Quaternary and X-Holocene) and three broad stages of development: Pre-Quaternary, Pre-Neogene, and Quaternary. Morphological types of relief are broken down into mountains, foothills, and plains between mountains and plains of large river valleys and subgrouping of these are given. Genesis of
