Title : On connecting high-voltage equipment to aluminum buses
Periodical : Elek. sta., 8, 34-36, Ag 1955
Abstract : The different manners of connecting high voltage apparatus are discussed, i.e. the use of copper joints, copper buses, aluminum joints, etc. The use of aluminum buses with aluminum joints is advocated. A table giving data on bolts is included. Two diagrams.

Title : Some Observations on an Outbreak of Mass Propagation of
the Nun Moth (*Lymantria monacha* L.) in Macedonian Forests.

Orig Pub : Zashtita bil'a, 1956, No 37, 73-80.

Abstract : An outbreak of the nun moth took place in 1955 in the
beech forests of Western Macedonia on a territory of
12000 hectares. In spite of the activity of the *Calosoma*
sycophanta and the bug *Pentastoma rufipes*, the propagation
of the pest took on a catastrophic character in 1956, but
the development of polyhedral disease caused the larvae
to be destroyed in mass; by the time of the third molting
a considerable number of them perished, and the remainder
were all infected.
