" The Radiological Evaluation of Functional Disorders in Spina Bifida."

Bucharest, Revista Sanitara Militara, Vol 62, No 2, Mar-Apr 66, pp 247-256.

Abstract: The authors discuss the general topic of the congenital malformation spina bifida and the associated functional disorders, and emphasize the usefulness of radiological studies to clarify the diagnosis of such disorders.

Includes 10 figures and 9 references, of which one Russian, 2 German, 3 French and 3 English-language. -- Manuscript submitted 6 August 1965.

AUTHOR: Lazarescu, I. (Colonel, Doctor); Palm, C. (Major, Doctor); Forns, E. (Doctor); Luzas, Al. (Doctor)

TITLE: Considerations on a case of osteohypertrophic varicose vein

SOURCE: Revista sanitara militara, no. 5, 1964, 815-819

TOPIC TAGS: circulatory system disease, cardiovascular system

ABSTRACT: The authors present and discuss a case of Klippel-Trenaunay syndrome in a 23-year old woman. The symptoms in this case only appeared after a thrombophlebitis attack in the lower leg, aggravated the congenital condition.

The term systems of aromatic hydrocarbons having condensed rings consisting of anthracene or phenanthrene parts have been investigated by means of the J. C. A. O. method and comparative calculations have been made as to the practicability of perturbation computations. The calculations resulted in a qualitatively true representation of the principal characteristics of the spectra but quantitative agreement is still not satisfactory.
