Tony for retention

Background

SAFE: (Support for Analyst's File Environment)

Information storage and retrieval system for Intelligence analysts. Dedicated on-line electronic information storage system. All-source type of data base both classified and unclassified. Functions: electronic "mail" delivery, automated text preparation and editing, rapid electronic coordination, electronic personal files. "Paperless Office" concept of data management. On-line 24 hours/day, 7 days/week--Uninterruptible Power Source (UPS) required.

ADSTAR: (Automated Document STorage and Retrieval)

Document Storage on film base (200x reduction) with automated retrieval for OCR. Expanded base to support SAFE document storage requirement. (SAFE requirement causes ADSTAR to require UPS power). "Larger-Faster" microform information (non-electronic data) system.

CAMS: [COMIREX (COMmittee on Imagery Requirement and Explotation)
        Automated Management System]

CAMS provides automated assistance to the Intelligence Community of overhead reconnaissance requirements. Functions to: Expedite, Coordinate and improve tasking flow of requirements for collection, Imagery Processing, Exploitation, and Imagery Distribution.
