DIRECTOR OF CENTRAL INTELLIGENCE
Intelligence Information Handling Committee
WASHINGTON, DC 20505

IHC/MM 84-11
20 January 1984

25 JAN 1984

LOCKED

MEET

MEMORANDUM FOR: IHC Members
FROM:
Chairman, Intelligence Information
Handling Committee
SUBJECT: IHC Meeting - 3 February 1984

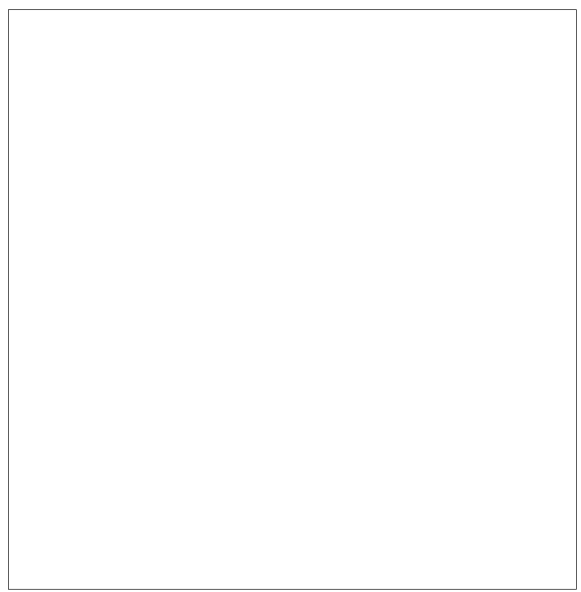

25X1

Attached please find a copy of the agenda for the next IHC meeting which
will be held on 3 February 1984 at 1330 in Room 6W02 of the Community
Headquarters Building. Also attached is a copy of the minutes of the December
meeting and a copy of a Formats Subcommittee proposal which I hope to discuss
at our February meeting. Finally, arrangements have been solidified for our
annual offsite meeting. It will be held at on March 5-7. Details will be
provided at our February meeting.

- 1430 S&T HUMINT Report Brief
- 1455 Video Disc Brief
- 1510 Subcommittee/Working Group Reports
- 1520 New Business
Formats Subcommittee Proposal
- 1530 Meeting Adjourn

IHC Minutes
16 December 1983

[redacted] (ICS/IHC) briefed the Committee on the current plans for phasing in the various information systems which will comprise CIRS. The attached Figures 1-5 reflect each of the five phases and the times currently estimated for their implementation. It was stated that the total effort is subject to revision, especially in view of budgetary and security considerations. It was reiterated that the results of the RECON Guard effort would affect the inclusion of CIA information into CIRS.

STAT

[redacted] (BDM) briefed on the progress of the CIRS Security Working Group. His briefing is also attached. It reflects that the initial CIRS security plan is very close to CIRS security requirements as they are currently understood. It also identifies task objectives, security areas addressed by the plan, trusted computer system evaluation criteria, the three stages of the plan, security issues, and a listing of the major CIRS security milestones.

STAT

One issue was raised as to the need for network versus host identification. It was noted that the DDCI wants to be able to identify who is accessing which documents. Does the network or host have this responsibility? Discussion on this followed, but the issue was not resolved. Next came the suggestion to use a standard Community identification to enable traceback to individuals. DIA indicated that a DODIIS standard user identification is in place and took three years to implement. The Chairman interjected that such issues need to be clearly defined in a manner which the IHC could address.

[redacted] stated that CIRS funds for FY 84 and FY 85 are still in the respective programs. He stressed that the resources are above the original DCI guidance as add-ons to individual agency programs and did not come "at the expense" of some other part of the NFIP. He also related that funds for COMPUSEC were also added and could be used for CIRS security. He suggested that now is the time to estimate costs for some of these requirements.

STAT

In the area of video disc mapping, the Chairman said that the Geographic Information Systems Subcommittee was working with [redacted] to look at the possibility of having a standard means of presenting and retrieving video disc based information. Coordination is underway with DMA, NSC and IC representatives to identify what the IC requirements may be and to incorporate them with those of NSC. DMA is the contracting agency for this effort.

STAT

[redacted] (ICS/IHC), Chairman of the IHC Telecommunications Subcommittee (ITS), said that suggested changes made by NSA to the telecommunications study had been incorporated in the study and that CIA has concurred in the changes. Response from DIA is awaited. The study should be published in January 1984.

STAT

The Chairman closed the meeting by noting that the IHC offsite meeting will be scheduled for early March. Details will be provided at the next IHC.
