MEMORANDUM FOR: NSA TOD Representative

SUBJECT : TOD Phase II Data Call for CCP.

REFERENCE : DepSecDef memo for Director, NSA,

dtd. 18 January 1969, subj. TOD.

The attached paper presents the TOD Committee view, in outline, of the TOD call for the CCP in conformity with referenced memorandum. This paper has been prepared in the light of the exploratory discussions between Colonel Wood, the DoD representative on the TOD Committee, and NSA representatives. We very much appreciate the efforts on both sides in these discussions and believe that they have provided the basic information needed to go on to resolve the detailed points of the NSA call which require further joint consideration.

I am sending this outline to you for examination, and am requesting that you arrange for NSA representatives to meet with the TOD Committee to work out these remaining details.

The TOD Committee as a group would like to meet with you and other appropriate NSA people at the very earliest moment. We will be pleased to meet at whatever location is most convenient to you, but our preference is to meet at your headquarters at Fort Meade. Please phone me within the next day or two to suggest a time and place for this meeting. The focus of the agenda will be a discussion of the attached paper.

25X1

Chairman, TOD Committee

Office of the Director of Central Inselligence

#### Outline of TOD Data Call for CCP

On March 7, 1969, the TOD Committee agreed to the following basic format for the TOD Phase II data call for the CCP subject to further discussion with NSA. The Committee has been working to make the CCP data call compatible with the Community TOD as outlined in the Instructions and Definitions for Target Oriented Display, December 1968 (Attachment A). Since the TOD Committee wants to rely, as much as possible, on information systems now being used by NSA and the SCA's, final resolution of the details of the data call must be worked out with NSA.

#### c. Support Costs:

For each group of support costs, only total costs will be needed. No geographic, subject, or mission allocation will be required.

## III. Other Problems to be Resolved

- A. Telemetry, Elint and Comint activities need to be separately identified in the collection and processing area. This is also true for associated R&D activities.
- B. TOD function and sensor categories for listing on Form 2812a must be resolved.
- C. TOD Support categories for station and headquarters reporting entities must be resolved in terms of NSA categories.
