**Mr. Heinz Warnecke  
The Mowing East  
Haddam, Connecticut**

Dear Heinz,

Further to your letter to me of 9 June and my brief reply of 7 July. We have reached a decision as to the form of recognition we wish to make of Allen's role in the construction of our building. It will be a bas relief head or bust as part of a bronze plaque in the main entrance way to the building. While this may not provide the most aesthetic benefit to the building, considering all the factors involved I feel we have the right solution.

We are all keen to have you undertake the work as you indicated you were willing to do. We have asked Allen to agree to some sittings for you this fall. The matter of timing has gone no farther than this. It would be useful if you could indicate to me roughly what times you would like to meet with Allen so that I may coordinate this with his plans when I learn of them.

Our current thinking is to place the plaque on the right wall upon entering the glass doors at the main entrance way approximately opposite the Biblical quotation from John on the left wall. However, we shall want to have your advice on location as well as the size and shape of the plaque. We are also considering some changes in the lighting in this area which would cast a strong vertical light down on the marble walls.
