"The most profoundly moving book yet written about the war."\*

"...some of the best writing about the war thus far."

"Oriana Fallaci has written several fine books. This may be her best and most moving. In it she writes with poignancy of her personal search, as a war correspondent, for some kind of sense in the Vietnam War. Her descriptions of fighting and death are some of the best writing about the war thus far."

—Publishers' Weekly

From "a woman of transcendent moral courage."

"She begins by hating the Americans in Vietnam and concludes by understanding them. NOTHING, AND SO BE IT will make you sick with rage and frustration if you read it, and you should, for it is the most profoundly moving book yet written about the war. Miss Fallaci's journal is a chronicle of understanding arrived at through suffering."
