Paul:

1. We have reviewed the referent as you requested and have the following comments:

a. Will the Procurement Division be responsible for the issuance of the solicitation and source selection process? If so, we believe that a representative from the Procurement Division should be on the Evaluation Board.

b. We do not concur with the recommendation that the Commerce Business Daily be used to publicize the proposed procurement. We have stated in several memoranda to OMB, OFPP, and the Congress that this procedure is contrary to Agency policy. While we recognize the importance of the project in terms of size, cost, and publicity, we do not believe that these factors warrant changing or deviating from a policy which has never been challenged in the past. What we need to do is solicit a reasonable number of A&E firms to submit qualification data to ensure that we obtain competition to the maximum practicable extent within the framework of our normal procurement procedures.

OL 1 5391a

Administrative - Internal Use Only

c. With regard to the selection criteria, the Defense Acquisition Regulation (DAR) precludes giving potential offerors the actual weights to be used in the evaluation process whereas it is optional under the Federal Procurement Regulations (FPR). We follow the DAR and recommend that the criteria and sub-criteria be placed in descending order of importance in the solicitation.

2. Please let us know if we can be of further assistance.
