

CONFIDENTIAL

01 April 1982

MEMORANDUM FOR: Chief, EAB

FROM:

Chief, CES

25X1

SUBJECT: Atlantic Research Corporation Meeting

25X1

1. A meeting was held on 1 April 1982 at the Atlantic Research Corporation (ARC) to discuss alternative ways to design EMI protection for the entrance(s) to the proposed new Headquarters building. The result of the meeting was a request for a proposal from ARC to provide the government with a tutorial paper on EMI techniques which would eliminate the need for gasketed doors. The proposal would be sent to the Architectural Staff; we would monitor the work. An additional consultant role was discussed with ARC to assist in monitoring future shielding requirements for the new building; there were no commitments made by either side.
