## PREFACE

This Joint Mission Coverage Index (JMCI) furnishes a listing of intelligence targets covered by Mission G 3018. Items in the index are arranged by (1) country, (2) WAC area within the country, and (3) coordinates reading from south to north and from west to east.

An explanation of codes used in presenting information in this report is contained in the appendix.

Mission G 3018 was accomplished on 3 January 1961, and covered portions of North Vietnam, South Vietnam, and Hainan Island (see accompanying Flight Line Trace). Heavy clouds and haze severely limited observation of targets along the flight line.

APPENDIX

## EXPLANATION OF COLUMN HEADINGS

### AND PHOTO REFERENCES

Column headings used in the listing are as follows (reading from left to right):

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. The city and installation name is followed by a capsule description, where appropriate.

Coordinates -- Coordinates are given to the nearest minute. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Target Numbers -- The Target Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second column lists the installation number assigned by PIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is a PIC target numbered 0586-1 and a PIC target numbered 0585-1. In each instance, the PIC installation is 1, but the installations appear on different WACs.

Subject Code (Sbj) -- The last column lists for each installation the subject code to which it has been assigned for recall purposes. The detailed subject code is as follows --
