

ORD # 983-82

ORD-192-82

25 February 1982

MEMORANDUM FOR: Associate Deputy Director for Science & Technology

FROM:

[Redacted]

STAT

Chief, Collection Technology Group  
Office of Research and Development

SUBJECT: Response to Attached Items

1. I have spoken with several Technical Officers in ORD regarding [Redacted] representation that his company has a special technique for vacuum deposition of titanium and the like. From our conversations, I conclude that this area is not a major problem in any of our current research program areas.

STAT

2. I also took the liberty to contact OTS about this communication. Discussions with two individuals there lead to the same conclusion.

3. On the basis of the above, a visit to [Redacted] would not appear to be a priority item. Obviously, if you have equities to protect or augment with Admiral Turner, we can send someone on a "fact-finding" mission. From my perspective, your idea to have [Redacted] appears to be the most appropriate course of action.
