

LIA 15-5K

15 NOV 1988

ICS 7211-88  
14 December 1988

NOTE FOR: Chairman, COMIREX

FROM: DDR&E/ICS

25X1

SUBJECT: Performance Indices

1. This note is a followup to our several conversations over the last number of months.

2. I would like you and your good people to invent some kind of performance indices which will substitute for the concept of "A/R." I want to stop using this old index in the next month or so and simultaneously I want to start using something else. The next performance indices have to be more focused, useful, and honest. I will be glad to go down to [redacted] and talk with your colleagues about my own ideas for a replacement. [redacted] already has a good sense of where my interests are leaning. This process of replacement is a subject you should mention in your next monthly report to the DDCI.

25X1

3. Further, I would like you to have someone--like [redacted]--create a short but relevant briefing which describes the many changes going on in how you as Chairman, COMIREX, and the staff, are improving our execution of the DCI's many responsibilities in the imagery arena. This briefing needs to be ready--after all of the discussion, drafting, and graphics work are done--to be presented beginning in the period of 10-20 January 1989.

25X1

4. If I can do anything to help you, please call.
