A survey of research findings shows that ordinary

[p. 393-409].

DESCRIPTORS: *Wind, Atmospheric motion, Dynamics,
Hydrodynamics, Numerical analysis, Thermodynamics,
*Atlantic Ocean, *Ocean currents.

This article establishes a method for solving the problem of formation and development of wind currents by giving the example of a four-level spheric model of the compact baroclinic ocean (area of the northern Atlantic), in which the terms which describe the density transfer are taken into account.
