METHODS FOR THE PRODUCTION OF FOAM
MATERIALS WITH SPECIAL CONSIDERATION OF
LEAVENING AGENTS. [1963] 25p. (figs. omitted)
58 refs.

Order from SLA \$2.60

63-14177

Trans. of reprint from Kunststoffe (West Germany)
1957, v. 47, no. 8, p. 446-455.

DESCRIPTORS: Production, *Foams, *Foam rubber,
*Expanded plastics, Gases, *Plastics, Rubber.

The importance of leavening agents for the production of
foam materials is briefly sketched by a survey of today's
foaming methods. The need exists of being able to put
in foaming agents which are as universal as possible,
that is, usable through a wide temperature range and
for the greatest possible number of plastics. Some
methods, which make possible an extensive influencing
of the qualities of a leavening agent, are here described.
