The author deals with the essential constituents of
unsaturated polyester resins and gives various methods
to prevent the inhibiting action of atmospheric oxygen
during the filmbuilding, such as addition of small
amounts of paraffin. New methods for the synthesis of
polyester resins suitable for coatings are given which

Deterioration of the functional capacity of the cardio-vascular system is of reflex origin in acute pancreatitis, as shown by a drop in arterial and venous pressures, slowing of the rate of blood flow, and the appearance of pathological shifts in the EKG. These changes, functional in nature, are indicative of decreased vascular tone and lowered myocardial function. The thera- (Biological Sciences--Pathology, TT, v. 10, no. 6) (over)

The task of the drifting stations North Pole-4 and North
 Pole-5 was to obtain experimental data on the heat
 balance of the Central Arctic. Measurement programs
 were drawn up which made it possible to determine the
 total and reflected radiation; the radiation balance; the
 irradiation of the atmosphere and the earth; the heat
 exchange between the atmosphere and the active sur-
 face which caused turbulent mixing; the heat exchange
