

Fries, Walter and Sinner, Herbert.  
BLEACHING DETERGENTS. [1960] 41p.  
Order from LC or SLA \$2.40, pb\$3.30      61-10146

Trans. of German patent application H 24 402,  
IV a/23c, app. 12 July 50; layout, 22 Nov 50.

Bleaching detergents containing substantially surface-active substances, inorganic salts and inorganic per compounds, and if necessary other common additives, are described. They are characterized by a content of anhydrides of low-molecular carboxylic acids or those halogen derivatives of low-molecular carboxylic acids which can be transformed by hydrolysis into carboxylic acids of their salts.

11-2, 562

The effect of desferrioxamine (DF) on iron excretion  
was studied by means of radioactive iron. In vivo  
measurements over bone marrow, liver and spleen, a  
temporary reduction of activity was found after in-  
fusion of DF. The observation that after DF infusion  
the calcium excretion sometimes increases, led us to  
(Biological Sciences--Pharmacology, TT, v. 10, no. 7)
