CZECHOSLOVAK AEROSOL GENERATOR

(Chekhoslovatskiy Aerozol'nyy Generator). 22 Sep 60, 4p. Trans. V-1621.

Order from LC or SLA m\$1.80, pb\$1.80 61-13804

Trans. of Lesnoye Khozyaystvo (USSR) 1958, v. 11, no. 9, p. 56-57.

The 11-kilogram RAG-1 generator consists of a pulsating atomizer, gasoline tanks, tanks for the toxic chemicals, and cooling and protective shells. In field tests with an 8% solution of DDT and hexachlorocyclohexane in diesel fuel the gasoline consumption was 1.2 liters per hour and chemical consumption was 18 liters per hour. The generator was good for treating single trees, gardens, and young tree cultures. Generator power was insufficient for treating dense plantations with trees over 30-meters high, and the operation was greatly effected by weather.

MEANS OF PREVENTING EXPLOSIONS IN AIR
SEPARATING EQUIPMENT. [1962] [16]p. 7 refs.
Order from OTS or SLA \$1.60 62-20158

Trans. of Kislodod (USSR) 1947, v. 4, no. 5, p. 26-34.

DESCRIPTORS: *Explosions, Air, *Acetylenes,
*Liquid oxygen, Separation, Industrial equipment.

A new method of removing acetylene from air, which provides explosion-proof operation of air separation equipment, was developed. The method is based on the results of investigation of the properties of the acetylene-liquid oxygen system, the dynamic adsorption by silica gel of acetylene from oxygen-nitrogen solutions, and the explosibility of the adsorbers. The method is finding increasing industrial application in large tonnage oxygen plants and also in plants producing technical nitrogen. (Author)
