Order from OTS or SLA \$1.60 61-23535

Trans. of Energiomash [mostroyeniye] (USSR) 1960
[v. 6] no. 5, p. 21-23.

DESCRIPTORS: *Turbines, Turbine blades, Tests,
Velocity.

Experiments at the Central Research Institute for
Boilers and Turbines showed that the velocity stages
with two rows of working blades are very economical.
With a 20-mm nozzle height and with radial seals pres-
ent the efficiencies of the two stages are 79% or better.
The effect of the first stage, having a degree of re-
action across the first row of moving blades of almost
zero, depends very little on the state of the radial
seals.
