Trans. of Japan patent publication 62-12627, applica-
tion 60-1239, 19 Jan 60, pub. 1 Sep 62.

DESCRIPTORS: *Photographic emulsions, *Photographic
images, *Silver compounds, Photographic chemicals,
Heat treatment.

The present invention relates to a method and means of
producing a positive with fidelity by employing a photo-
silver halogenide negative emulsion layer containing a
developer and after exposure to light placing a positive
layer in contact with the negative emulsion layer, by
applying heat thereto. This invention also relates to
unique finishing processes of the positive layer.
