TESTS FOR DETERMINING THE HEAT OF DECOM-
POSITION OF MINERALS. [1962] 16p. 5 refs.
Order from SLA \$1.60 62-16593

I. Földvari-Vogl, M.
II. Kliburszky, B.

Trans. of Acta Geologica (Hungary) 1958, v. 5,
p. 187-195.

DESCRIPTORS: Minerals, Decomposition, Pyrolysis,
Test methods, Bonding, Calorimetry.

A determination of the heat of decomposition of various
minerals was carried out by differential thermal anal-
ysis, as well as by means of a microcalorimeter
specially designed for this purpose. A theoretical
agreement was sought between the respective results
obtained by these two methods, and a reciprocal con-
version of the results of the two series was attempted.
We hope that further development of our calorimetric
results will permit us to determine the bonding force
of the OH-radicals of the minerals. (Author)
