DESCRIPTORS: *Hematology, *Electrocardiography,
Diseases, *Pancreas.

Deterioration of the functional capacity of the cardio-
vascular system is of reflex origin in acute pancreatitis,
as shown by a drop in arterial and venous pressures,
slowing of the rate of blood flow, and the appearance of
pathological shifts in the EKG. These changes,
functional in nature, are indicative of decreased vascular
tone and lowered myocardial function. The thera-

The task of the drifting stations North Pole-4 and North Pole-5 was to obtain experimental data on the heat balance of the Central Arctic. Measurement programs were drawn up which made it possible to determine the total and reflected radiation; the radiation balance; the irradiation of the atmosphere and the earth; the heat exchange between the atmosphere and the active surface which caused turbulent mixing; the heat exchange (Earth Sciences--Meteorology, TT, v. 5, no. 8)(over)
