II. RELATION BETWEEN DETERGENCY AND  
WATER HARDNESS. [1960] [8]p. 5 refs.  
Order from SLA ml\$1.80, ph\$1.80 61-10296

Trans. of [Fette Seifen Anstrichmittel] (West  
Germany) 1952, v. 54, p. 321-324.

Synthetic detergent raw materials are influenced in a  
negative manner by hard water. The cleaning effect  
depends on the manner of soiling and the fabric tested.  
Nonionic detergents are subject to the negative effect  
of hard water as much as anionic compounds. Con-  
siderable differences in action exist between synthetic  
and natural water hardness. The relationship of Ca to  
Mg is more important than the degree of hardness  
itself. Magnesium salts thus may be considered for  
use as builders for synthetic detergents. (Author)

p. 475-477.

DESCRIPTORS: \*Rats, Intestine, Microorganisms,  
Sterility, Epidemiology, \*Diseases.

Paratyphoid and dysenteric microbes were discovered  
in the intestines of gray rats of the city of Kiev. The  
peritrichous organs of the live and healthy rats  
were sterile. The microbial dissemination of the  
peritrichous organs of the dead rats takes place  
posthumously from the contents of their intestines.
