Tsapryin, V. N.

ON A HURWITZ PROBLEM FOR TRANSCENDENTAL EQUATIONS. [1961] [41]p. 17 refs.

Order from LC or SLA ml\$3. 30, ph\$7. 80 61-15317

Trans. of Prikladnaya Matematika i Mekhanika (USSR) 1948, v. 12, p. 301-328.

We consider in this paper the Hurwitz problem for a transcendental equation of the form

$(a_1 z^2 + a_2 z + a_3) \operatorname{ch} z + (b_1 z^2 + b_2 z + b_3) \operatorname{sh} z = 0$   
 with real coefficients of any sign. The method of solution is based on a generalization of the Sturm series. The results are formulated in the form of inequalities that relate the coefficients. The satisfaction of these inequalities is necessary and sufficient to have the roots of the given equation lie all on the left half plane.
