Trans. of article from an unidentified source, 1961,
v. 12.

DESCRIPTORS: *Radiation effects, *X-rays, Rabbits,
*Brain, *Nucleic acids, Viscosity, Nucleotides

In spite of the fact that the nerve cells and the brain
tissue of these rabbits continue to grow increasing in
size and differentiating, momentary total irradiation
at 800/r does not influence notably the amount of DNA,
its structural viscosity or the content of purine and
pyrimidine bases of DNA. Ionizing irradiation evokes
the decrease of the amount of thymine in DNA; this
